

# Meet Juno.

## Capturing and sharing lesson content is finally easy

**A**t last, FrontRow's all-new Juno® digital communication platform has arrived – combining the convenience of a portable audio device with the sound quality and educational benefits of an installed system.

But this isn't just your typical "sound system." With Juno, busy teachers can use the time-saving, results-boosting power of lesson capture through voice-activated commands. If teachers can say "begin" and "finish," Juno can handle the rest!

Like magic, Juno's exclusive lesson capture feature records teacher and student voices, media audio, and the computer screen, automatically titles these audio/video clips with the right subject based on the teacher's schedule, and helps post them for students to review at night — all in a format viewable on personal devices.

### How Juno Provides the Best Bang for Your Technology Buck

Along with saving teachers time and making learning more accessible, Juno:

- **Requires zero installation and is completely portable**
- **Is simple for teachers to use – which means less training and troubleshooting**
- **Makes lesson capture more practical to implement throughout your school**
- **Allows for distance learning opportunities where sound is clearly projected throughout the classroom**
- **Provides full integration with interactive whiteboards, mp3 players, laptops, and other multi-media devices**
- **Bluetooth-enabled, enriching lesson delivery and content variety. Perfect for expandable learning spaces, creates a stereo high-fidelity sound experience.**
- **Offers a fully scalable solution – Juno's desktop software serves as your gateway for add-on features and updates to serve your technology needs today and tomorrow**

*Because Juno is so easy for teachers to use – they simply talk into the microphone to issue commands – there is less need for you to train and troubleshoot.*
